1 Secure distribution of watermarked images for a digital library of ancient papers 80

Christian Rauber , Joe Ó Ruanaidh , Thierry Pun

Proceedings of the second ACM international conference on Digital libraries July 1997

2 Broadcast and on-line cultural heritage: Copyright protection and management and a web based library for digital images of the Hellenic cultural heritage 77

Dimitris K. Tsolis , George K. Tsolis , Emmanouil G. Karatzas , Theodore S. Papatheodorou

Proceedings of the 2001 conference on Virtual reality, archeology, and cultural heritage November 2001

The main issue addressed in this paper is the design and implementation of an Advanced Digital Image Repository, which offers specialized services and a Dedicated User Interface for the protection and management of the Intellectual Property Rights of digitized material. In addition, another main research area of this contribution is the implementation of a Web Based Library, supported by advanced technologies, for the proper presentation of the digital cultural content. The work described in thi ...

3 Shape retrieval and watermarking: 3D zernike descriptors for content based shape retrieval 77

Marcin Novotni , Reinhard Klein

Proceedings of the eighth ACM symposium on Solid modeling and applications June 2003

Content based 3D shape retrieval for broad domains like the World Wide Web has recently gained considerable attention in Computer Graphics community. One of the main challenges in this context is the mapping of 3D objects into compact canonical representations referred to as descriptors, which serve as search keys during the retrieval process. The descriptors should have certain desirable properties like invariance under scaling, rotation and translation. Very importantly, they should possess de ...

4 Query-preserving watermarking of relational databases and XML documents 77

David Gross-Amblard
Proceedings of the twenty-second ACM SIGMOD-SIGACT-SIGART symposium on Principles of database systems June 2003
Watermarking allows robust and unobtrusive insertion of information in a digital document. Very recently, techniques have been proposed for watermarking relational databases or XML documents, where information insertion must preserve a specific measure on data (e.g. mean and variance of numerical attributes.)In this paper we investigate the problem of watermarking databases or XML while preserving a *set of parametric queries in a specified language*, up to an acceptable distortion.We first ...

8 Cumulating and sharing end users knowledge to improve video indexing in a video digital library 77
Marc Nanard , Jocelyne Nanard
Proceedings of the first ACM/IEEE-CS joint conference on Digital libraries January 2001
In this paper, we focus on a user driven approach to improve video ind exing. It consists in cumulating the large amount of small, individual efforts done by the users who access information, and to provide a community management mechanism to let users share the elicited knowledge. This technique is currently being developed in the "OPALES" environment and tuned up at the "Institut National de l'Audiovisuel&r dquo;(INA), a National Video Library in Paris, to increase the v ...

9 Transcript-free search of audio archives for the national gallery of the spoken word 77
John H. L. Hansen , J. R. Deller , Michael S. Seadle
Proceedings of the first ACM/IEEE-CS joint conference on Digital libraries January 2001
The National Gallery of the Spoken Word (NGSW) project is creating a carefully organized on-line repository of spoken-word collections spanning the 20th century. Unprecedented technical challenges are inherent in the development of an archive of such extensive scale and diversity. This paper describes research on the development of text-free search-engine technology used to locate requested content in the audio records. A companion paper in these proceedings addresses watermarking te ...

10 Hypermedia-aided design 77
Darko Kirovski , Milenko Drinic , Miodrag Potkonjak
Proceedings of the 38th conference on Design automation June 2001
Recently, the Internet revolutionized many activities from entertainment to marketing and

business. Two key underlying Internet technologies, efficient data delivery and hypertext, demonstrated exceptional potential as new application enablers. In this paper, we present a novel Hypermedia-Aided Design (HAD) collaboration framework that facilitates new communication and data presentation paradigms to improve the effectiveness of typical EDA applications. The framework leverages on the advant ...

11 Can Web development courses avoid obsolescence? 77

Frank Klassner

ACM SIGCSE Bulletin , Proceedings of the 5th annual SIGCSE/SIGCUE ITiCSEconference on Innovation and technology in computer science education July 2000

Volume 32 Issue 3

Yes.

12 Multimedia access and retrieval (panel session): the state of the art and future directions 77

Gwendal Auffret , Jonathan Foote , Chung-Shen Li , Behzad Shahraray , Tanveer Syeda-Mahmood , HongJiang Zhang

Proceedings of the seventh ACM international conference on Multimedia (Part 1) October 1999

13 Taming the wolf in sheep's clothing: privacy in multimedia communications 77

Anne Adams , Martina Angela Sasse

Proceedings of the seventh ACM international conference on Multimedia (Part 1) October 1999

When ubiquitous multimedia technology is introduced in an organization, the privacy implications of that technology are rarely addressed. Users usually extend the trust they have in an organization to the technology it employs. This paper reports results from interviews with 24 Internet Engineering Task Force (IETF) attendees whose presentations or contributions to IETF sessions were transmitted on the multicast backbone (Mbone). Due to a high level of trust in the organization, these users ...

14 Webware: a course about the Web 77

David Finkel , Isabel F. Cruz

ACM SIGCSE Bulletin , Proceedings of the 4th annual SIGCSE/SIGCUE ITiCSE conference on Innovation and technology in computer science education June 1999

Volume 31 Issue 3

Sophisticated applications and software development on the Web demand an extensive and thorough understanding of a variety of computer science disciplines, as well as providing their own set of issues. Therefore, we have created an advanced undergraduate computer science course called *Webware: Computational Technology for Network Information Systems* that builds upon and extends knowledge previously gathered by the students. We describe its contents, our teaching experience, and address th ...

15 Introducing a legal strand in the computer science curriculum 77

Cristina Cifuentes , Anne Fitzgerald

Proceedings of the third Australasian conference on Computer science education July 1998

16 Interoperability for digital libraries worldwide 77

Andreas Paepcke , Chen-Chuan K. Chang , Terry Winograd , Héctor García-Molina
